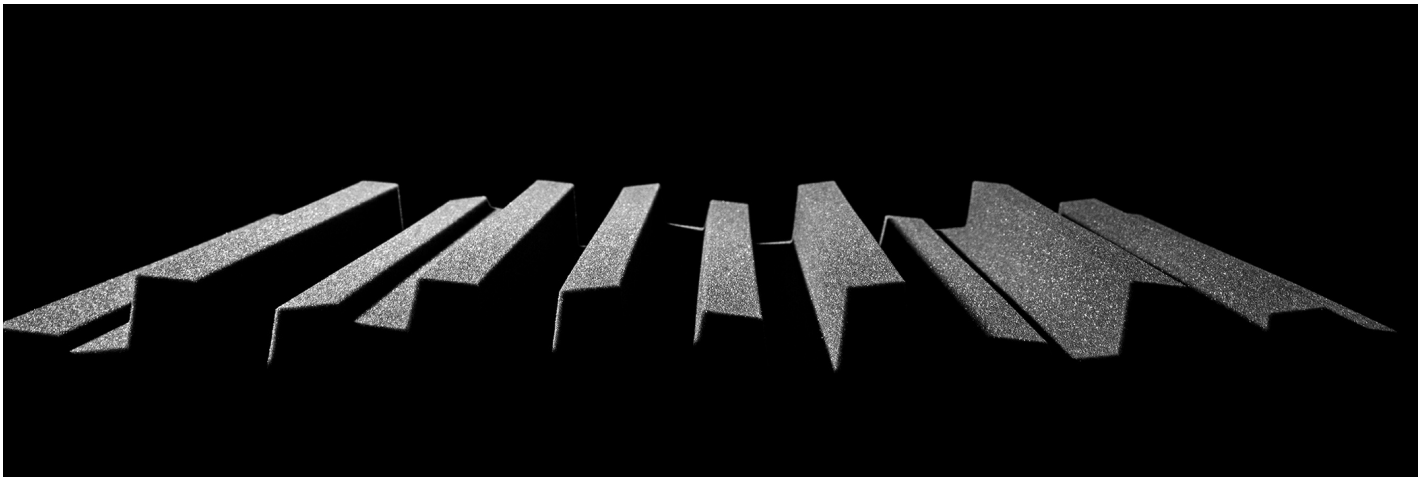
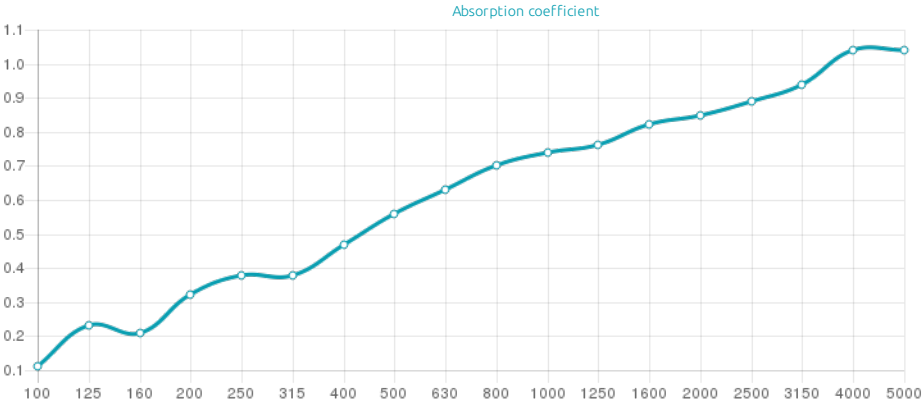
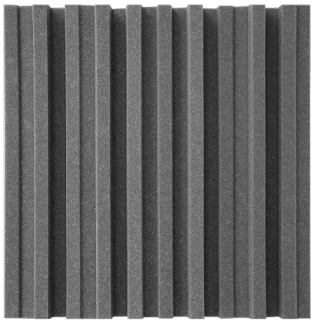
Agad - Absorber

Foam Absorber

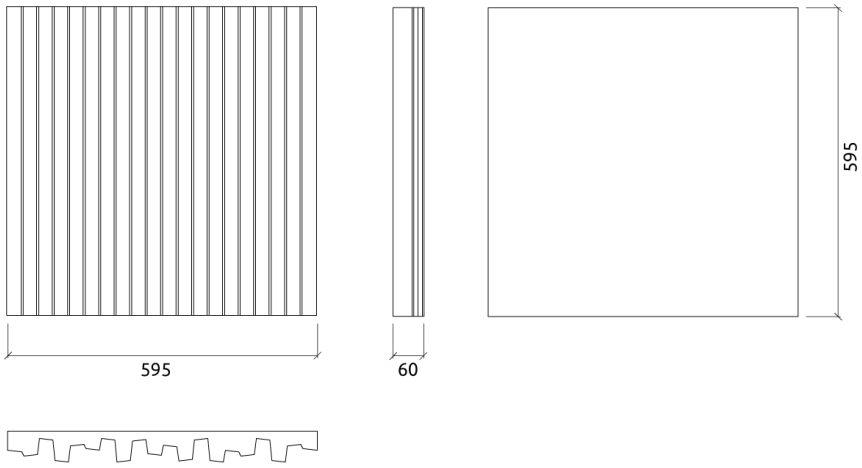


Performance





Technical Information



Features

Type:
Absorber

Absorption range: 400 Hz to 5000 Hz

Acoustic Class: C | (αw) = 0,65

Available fire rates:
FG | Furniture Grade

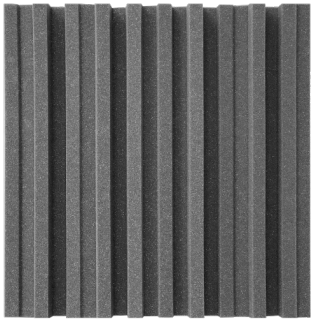
Material:
- Calibrated cell acoustic foam

Dimensions:

FG - F | 595x595x60mm | 0.33 Kg

Agad - Absorber

Foam Absorber



Agad Absorber is a stylish, minimalistic panel, created following a MLS sequence. Its unique design delivers high effective absorption at a low cost. This 100% foam panel was designed to deal with first reflection problems and to perform within an absorption range from 400 Hz to 5000 Hz. Especially easy to install, we recommend this panel for use on side walls and ceilings.

Artnovion has optimised this product to its limit, from production to packaging. We have increased the absorption surface, optimised performance, reduced raw material waste and product volume by 33%, that allows for 10 panels per box, decreasing shipping costs.
