

Performance

Features

Type: Absorber
 Absorption Range:: 350 Hz to 4000 Hz
 Acoustic Class: C | (aw) = 0,87

Materials:

- Natural wood finish
- Marine-grade plywood structural frame
- Calibrated cell acoustic foam

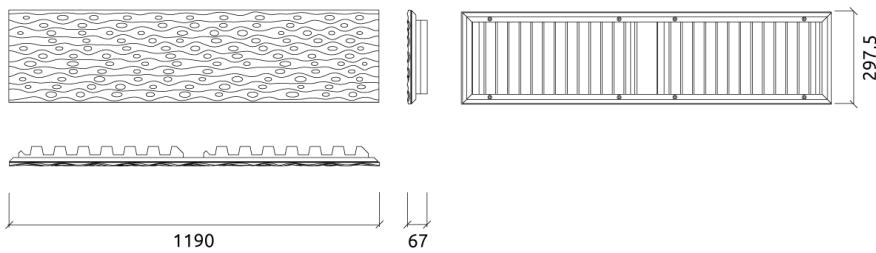

Eight M6 Screw Thread receiver included on each panel.

Dimensions:

FG - NW | 1190x297x63mm | 1.5 Kg

Technical Information

Sahara Doble H W Fagus

Wooden Absorber

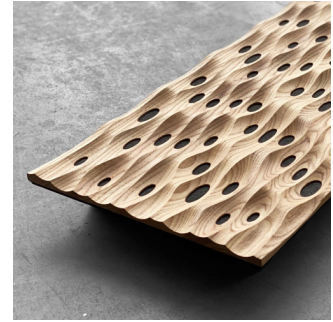

Sahara Fagus is carefully crafted and finished from solid wood. As it is an all natural wood product, it is susceptible to expansion and contraction with temperature and humidity. In order to improve the stability of the product, we will be mounting each section on an individual frame, as opposed to mounting two pieces together. This requires to double-up the fixing systems of the product, but guarantees the stability of the panel.

Product finishes

(FG - NW) Natural Wood Finishes

FG | (W04) Fagus

**Purpose**

- RT reduction
- Flutter echo control
- Reducing excessive reverberation
- Improving speech intelligibility
